

ZOOLZ INTELLIGENT CLOUD

Product Datasheet

Zoolz Intelligent is **the future of cloud storage**

Upload any file and our technology will structure the files without you having to lift a finger. Think of it as a search engine for your data. And, like a search engine, you can find any file in a quick and secure way, allowing you to concentrate on what really matters; your business.

How it Works

1. Sign up

Enter your details and register with Zoolz.

2. Configure

Download the setup and you're done. Alternatively, you can add users, create backup policies, set user privileges, and deploy the backup software to users for automatic protection.

3. Back up

Zoolz automatically uploads all data from computers, servers, mobile and devices. All data is secured with military-grade encryption.

4. Analyze

Any file uploaded is analyzed, processed and indexed for intelligent discovery.

5. Discover

Discover your big data just like a search engine - quick and secure. In just a few clicks, you can get relevant results in near-real time, meaning you can focus on your business.

FEATURES

- Instantly search all your content
- Discover scanned documents with OCR technology
- Stream videos
- Automatic backups
- Global language support - 22 languages
- User Access management
- Remote backup configuration
- Remote restore
- Mobile/Tablet backup
- NAS/Network and external drive backup support
- Data retention policies
- Organize files by tags
- Complete Audit logs
- Backup policies
- Active Directory Deployment
- Hot/Cold Storage
- Import/Export data directly to data centers

The list is endless...

Why Zoolz Intelligent?

Content Discovery

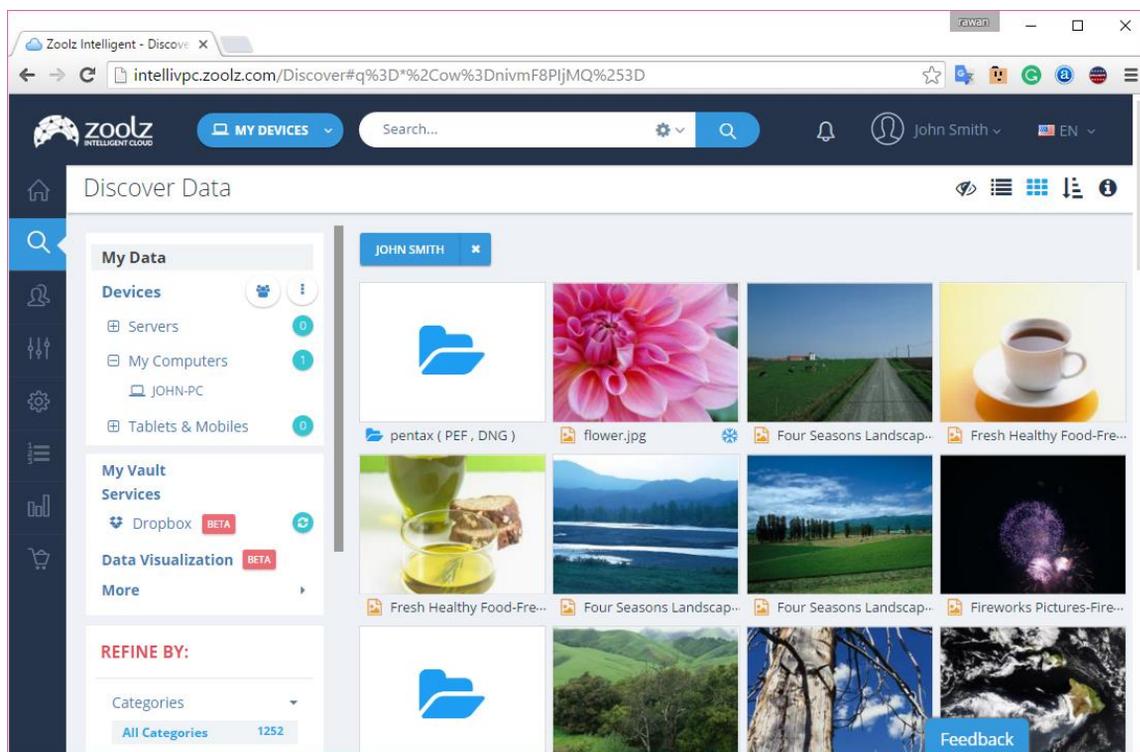

It's happened to all of us; that moment when you're looking for a file for an important meeting but can't remember the name. Now, you don't have to. All you have to do is type in a keyword or phrase and voila! You'll get a list of search results along with a preview of the sentence it's used in.

OCR Discovery

Locating PDFs and scanned documents can be cumbersome. We've solved this problem with our Optical Character Recognition analyzer, which indexes all of your scanned documents. There's no need to remember filenames. You can now search by content. This feature is also available in 22 languages.

Media Aware

Ever wanted your cloud service to offer streaming without any buffering? Well, now you can. By perceptively analyzing the files you upload, our technology will create an optimized version of all your video files, making it available for streaming and instant sharing. Zoolz Intelligent supports HD, 4K and 3D video formats.

Simple Administration

Zoolz Intelligent offers a centralized administration console used to deploy, configure, audit, restore and grant access to users. All from the comfort of your seat.

Secure and compliant

Zoolz Intelligent resides on Amazon Web Services, which is trusted by Fortune 100 companies and the US government. For the fifth year, AWS has been named the leader of the IaaS. It also adopts military-grade encryption on the stored data in the cloud.

Automatic Protection

With our automatic protection feature, we've made it easier to backup any new or amended file. All you have to do is upload the data and we'll do the rest.

Complete Audit Log

This tamper-proof solution will allow you to track all data searches, file changes, shares and deletions, right down to the time and source of the action.

Unified Cloud

All data located on computers, mobile devices, external drives, servers, network devices and services like Dropbox, are imported into Zoolz for safekeeping and discovery.
